#5742

Nutritional Use

KNS Calm & Soothe Equine Supplement is formulated specifically for nervous, excitable, stressed or spooky horses. The two key ingredients to Calm and Soothe is Albion's MAAC® Magnesium Amino Acid Chelate* and L-Tryptophan.

L-Tryptophan is an amino acid that, once ingested by mono-gastrics, is converted into Serotonin, a natural hormone to calm and relax your animal.

Albion's Magnesium Amino Acid Chelate* is the only true chelated magnesium on the market. There is a direct connection between Magnesium levels and an animals performance. Magnesium has an important part in neurochemical transmission, cardiac homeostasis, muscle and nerve function and maintaining normal intracellular calcium, phosphorus, sodium, potassium and energy levels and utilization.
